Amazon is the world's largest e-commerce retailer and cloud services provider. The company was originally a book store but has expanded to sell a wide variety of consumer goods and digital media. They also sell their own electronic devices. Amazon's search engine is driven to create the most sales. Amazon has created several millionaires. Amazon has a yearly revenue of \$232 Billion USD which is growing at a rapid pace year over year. Amazon also has a market cap of \$900B+ USD, which has grown over 2000% over the last 10 years. Google is the world's largest search engine provider. Google helps you find you the answer to any question, along with necessary information such as websites, pictures, maps or videos. Google uses a web crawler that looks at the billions of websites available on the internet and examines their content to find the most important, relevant content for your search and then delivers the best links to this content instantly. Many people don't know this however Google has also created several millionaires. This is primarily from experts in paid advertising and search engine optimisation (SEO), who've built businesses based on their knowledge. Google has a yearly revenue of \$116 Billion USD. Google also has a market cap of \$820B+ USD, which has grown over 400% over the last 10 years. What many people don't realise, is that both Amazon and Google's search algorithms can be manipulated. My students, consulting clients and I optimise our Amazon listings on Google so that we can gain the best results. What's the point in having the best product or service, if no one can find it? Many people simply can't afford my courses or consulting, yet they still need help to get the results they need for their business/businesses. That's why I've created this book, to bring clarity to the way that Amazon and Google search engine work, in the simplest way possible. This way you don't need years of experience manipulating search algorithms, to get the results you need. Did you know that by sending traffic from Google to Amazon, Amazon will reward you with greater sales on their platform? You're probably wondering... who am I, and why should you read this book? I am a 24 year old entrepreneur and philanthropist. I use Google search engine to build successful online businesses. I'm known by my students as the king of Google. My most notable success is for helping thousands of students in Turkey become financially free on Amazon with the help of Google search engine and my business partner, Ekim Kaya. We were featured in many major news outlets for this, such as ABC, NBC and Fox. I have a following of over 95,000 people on Facebook and 30,000 on Instagram. My goal is to help more ordinary people like myself, make a living online. I was able to overcome extreme poverty to do this and I believe anyone can do the same. When I first started learning Google, I was able to create success within 6 months for a local lead generation website for the plumbing industry. It started to generate dozens of calls per month which I directed to a local business. I done this with no backlinks, just exceptional on-site content. This is when I learned the power of passive income online. I used this knowledge to create my own historic Edinburgh, exotic car tour company, which I was able to rank on the first page on Google, with less than \$200, beating competition willing to pay Google ads \$5-10 per click to get customers in. I then showed the success to my mentor, Ekim Kaya, and said I wanted to rank Amazon products on his store. He agreed and we thought it was going to be as easy as my previous successes. When we tried it with Amazon products, we failed. We had to learn how to manipulate the Amazon listing to get it to rank in Google. The title, features and description, along with backlinks weren't enough. In the book, you'll learn what we had to add to get it to rank. Once you find out, your income will skyrocket.
