The forbidding Big Badlands in Western South Dakota contain the richest fossil beds in the world. Even today these rocks continue to yield new specimens brought to light by snowmelt and rain washing away soft rock deposited on a floodplain long ago. The quality and quantity of the fossils are superb: most of the species to be found there are known from hundreds of specimens. The fossils in the White River Group (and similar deposits in the American west) preserve the entire late Eocene through the middle Oligocene, roughly 35-30 million years ago and more than 30 million years after non-avian dinosaurs became extinct. The fossils provide a detailed record of a period of abrupt global cooling and what happened to creatures who lived through it. The book provides a comprehensive reference to the sediments and fossils of the Big Badlands and will complement, enhance, and in some ways replace the classic 1920 volume by Cleophas C. O'Harra. Because the book focuses on a national treasure, it touches on National Park Service management policies that help protect such significant fossils.

Calista "I am the monster they created. I'm the whore they're ashamed of." When life tried to break me I grabbed that b*tch by the throat and squeezed. I thought I could overcome anything. I swore I could handle him, but after being forced to play at the Devil's playground I ended up craving his touch. One taste of his poison made my loyalties begin to waiver. Romero "I'm a living nightmare, I'm everything they fear." I've been called the Devil, deranged, and a savage. I lived by a code created by rebel souls. We were sinners and thieves that made no apologies for taking whatever the f*ck we wanted. Saving a girl in the woods was never part of my plans, but when I saw the crazy in her eyes I knew it was a match made in hell. Now secrets are piling up, the bodies are rotting, and time is running out to finish what I started. Forewarning, our story is more than a little f*cked up.
