Who was Sai Baba? Where did he come from and what was his message? How and why was he worshipped as a God? Who were his disciples and why were they attracted to him? What do his devotees, numbering millions all over the country, think of his lilas? Have they experienced his compassion, and received succour and relief in their hour of need? These questions are answered in this biography of a living God who charmed and captured the hearts of people from all walks of life, of all religions, rich and poor, the learned and the illiterate. Many books have been written about Sai Baba of Shirdi but this one is different. For the first time a comprehensive and objective account of the life and times of Sai Baba is given in simple and easy to-understand language without omitting any aspect of Baba ` s life and his philosophy. The book presents an absorbing story of a man who came to Shirdi as a fakir, was teased by children and frowned upon by sceptical villagers and remained to reign as a spiritual leader, the greatest saint of all times. He became a god who walked on earth. It is a book which every Sai devotee would like to possess as a Bible of Baba ` s teachings and a remembrance of the great Master whose idol or portrait adorns the prayer rooms of millions of homes throughout the country.

This volume provides a critical examination of the evolution of platform economies in India. Contributions from leading media and communications scholars present case studies that illustrate the social and economic ambitions at the heart of Digital India. Across interdisciplinary domains of business, labour, politics, and culture, this book examines how digital platforms are embedding automated systems into the social fabrics of everyday life. Encouraging readers to explore the phenomenon of platformisation in context, the book uncovers the distinctive features of platform capitalism in India.

A very enjoyable and educative book indeed. -Bibek Debroy Chairman, Economic Advisory Council to the Prime Minister An unusual book. -Professor S. Irfan Habib Former Maulana Azad Chair, National University of Educational Planning and Administration, New Delhi The book is simply 'unputdownable'. -Rasheed Kidwai Visiting Fellow, ORF Congress leader Arjun Singh was aware of the imminent appointment of Dr Manmohan Singh as the prime minister. What did he do to sway the decision in his favour? Did Prime Minister Chandra Shekhar help the religious leader Chandraswami escape the dragnet of the Enforcement Directorate? What prompted the editor of Hindustan Times to publish an article titled 'National Shame' on the front page of the newspaper? How did a typo in a copy received by All India Radio lead to an inquiry by the Pakistani authorities regarding a 'mole' in their midst? Instant History is a brilliant insight into our recent history. A treasure trove for all those who believe that journalists write the first draft of history, this is an honest perspective on various issues in the context of many geographical complexities, political realities and social dichotomies. Narrated through short pieces and snippets, it unveils several incidents and exposes ground realities that afflict politics, bureaucracy and even journalism. Moreover, serving a slice of history, it documents changes India has witnessed across the last quarter of the preceding century, providing insights into the history of public administration. Anecdotal, humorous and often caustic, Instant History is a fabulous work on Indian journalism and politics recounted by a senior journalist with an insider view of affairs.

A biophysicist reveals the hidden unity behind nature ` s breathtaking complexity The form and function of a sprinting cheetah are quite unlike those of a rooted tree. A human being is very different from a bacterium or a zebra. The living world is a realm of dazzling variety, yet a shared set of physical principles shapes the forms and behaviors of every creature in it. So Simple a Beginning shows how the emerging new science of biophysics is transforming our understanding of life on Earth and enabling potentially lifesaving but controversial technologies such as gene editing, artificial organ growth, and ecosystem engineering. Raghuveer Parthasarathy explains how four basic principles—self-assembly, regulatory circuits, predictable randomness, and scaling—shape the machinery of life on scales ranging from microscopic molecules to gigantic elephants. He describes how biophysics is helping to unlock the secrets of a host of natural phenomena, such as how your limbs know to form at the proper places, and why humans need lungs but ants do not. Parthasarathy explores how the cutting-edge biotechnologies of tomorrow could enable us to alter living things in ways both subtle and profound. Featuring dozens of original watercolors and drawings by the author, this sweeping tour of biophysics offers astonishing new perspectives on how the wonders of life can arise from so simple a beginning.

With the phenomenal growth of newspapers and periodicals in India, their styles have become as unique as the identities of individuals. Keeping track of the changing scenario in the Indian English press, this book presents a critical study of stylistic variations followed by leading dailies and periodicals. The exposition is supported by an in-depth analysis of historic case studies like Indira Gandhi's assassination, Bhopal gas tragedy and terrorism in Punjab. Also the book tries to answers some critical questions like: \* Will the print media survive the Onslaught of the electronic media? \* Can a journalist be really objective in the present scenario?
