In Learn Robotics with Raspberry Pi, you'll learn how to build and code your own robot projects with just the Raspberry Pi microcomputer and a few easy-to-get components - no prior experience necessary! Learn Robotics with Raspberry Pi will take you from inexperienced maker to robot builder. You'll start off building a two-wheeled robot powered by a Raspberry Pi minicomputer and then program it using Python, the world's most popular programming language. Gradually, you'll improve your robot by adding increasingly advanced functionality until it can follow lines, avoid obstacles, and even recognize objects of a certain size and color using computer vision. Learn how to: - Control your robot remotely using only a Wii remote - Teach your robot to use sensors to avoid obstacles - Program your robot to follow a line autonomously - Customize your robot with LEDs and speakers to make it light up and play sounds - See what your robot sees with a Pi Camera As you work through the book, you'll learn fundamental electronics skills like how to wire up parts, use resistors and regulators, and determine how much power your robot needs. By the end, you'll have learned the basics of coding in Python and know enough about working with hardware like LEDs, motors, and sensors to expand your creations beyond simple robots.

Ever wondered how to make a computer follow instructions? If so, then it is time to get coding! Accessible, engaging, and fun, this book is bursting with eye-catching illustrations and fantastic projects to introduce aspiring young programmers to the world of coding.

In the modern age of authenticity and transparency, consumers are no longer content with brands that are dismissive of, or even apathetic to, sustainability. Brands are now expected to convey understanding and concern when it comes to matters such as climate change, carbon footprints and employee welfare. Most importantly of all, they must be genuinely committed to these standpoints – remaining consistent and proactive in

their principles. With the rise of more conscious consumers and the belief-driven buyer, organizations ignore sustainability and the spirit of 'doing good' at their own peril. From three marketing experts with decades of experience between them, Sustainable Marketing delivers the new benchmark for modern marketing. This book clarifies the importance of the sustainable approach before providing a comprehensive guide to implementing, driving and maintaining these practices in any organization. A must-read for any business leader or marketing executive, this is a unique and fascinating blend of academic research and practical case studies that will kick-start and inspire sustainable initiatives.

Your biggest asset in leadership is you. How can you expect people to trust and believe in you, if you aren't truthful and don't embrace your whole self at work? There is a need for a new kind of leadership; one that bleeds personality and rings true to employees and customers alike who crave authenticity. You Lead argues that business leaders deliver superior results, communities of engagement both inside and outside of the company and true values-driven success when they are themselves and come across as genuine. Bestselling author, Minter Dial, shows readers how embracing your whole self at work encourages people to also be themselves, seek true fulfilment at work and merge the personal and professional to become true examples of what you stand for. You Lead is a call to arms to leaders to stop pretending to be who they are not, and play on their uniqueness and strengths, to allow people to do the same and develop a culture of authenticity and purpose. With practical advice, real-life stories and a simple framework, this book shows you how you can: - Be yourself, lead by example and merge the professional and personal - Stand for something and allow people to develop true purpose at work - Allow a community to flourish through the right kind of governance model - Radiate your purpose through employees and customers alike for long-term performance
