Crocodiles (subfamily Crocodylinae) or true crocodiles are large semiaquatic reptiles that live throughout the tropics in Africa, Asia, the Americas and Australia. Crocodylinae, all of whose members are considered true crocodiles, is classified as a biological subfamily. A broader sense of the term crocodile, Crocodylidae (which includes Tomistoma), is not used in this article.

## **Crocodile - Wikipedia**

Crocodiles are the largest and the heaviest of present-day reptiles. The largest representatives, the Nile crocodile (*Crocodylus niloticus*) of Africa and the estuarine (or saltwater) crocodile (*C. porosus*) of Australia, attain lengths of up to 6 metres (20 feet) and weigh over 1,000 kg (about 2,200 pounds).

## **American Crocodile | National Geographic**

Crocodile - Crocodile - Natural history: The young crocodile emerges from the egg with a length of 20–30 cm (8–12 inches). At first it remains with its siblings concealed at the edge of its water habitat in order to avoid various predators. Principal among these are fishes and birds, but larger crocodiles also prey upon the young.

## **Crocodile - Natural history | Britannica**

The Crocodile is a large aquatic reptile that lives throughout the Tropics in Africa, Asia, the Americas and Australia. Crocodiles tend to congregate in freshwater habitats like rivers, lakes, wetlands and sometimes in brackish water (water that is saltier than fresh water, but not as salty as seawater). Some species, particularly the Saltwater Crocodile of [...]

## **Crocodile - Facts, Diet & Habitat Information**

The American crocodile (*Crocodylus acutus*) is a species of crocodylian found in the Neotropics. It is the most widespread of the four extant species of crocodiles from the Americas, with populations present from South Florida and the coasts of Mexico to as far south as Peru and Venezuela.. The habitat of the American crocodile consists largely of coastal areas.

## **American crocodile - Wikipedia**

When a monkey on a desert island sees a banana tree on a faraway island, she must devise a clever way to navigate the crocodile-infested waters using her counting skills. Children's BOMC. Reprint.

Crocodiles and alligators may seem ferocious and scary, but renowned science author Seymour Simon confirms that they're also endlessly fascinating. Around since the time of dinosaurs, crocodiles and alligators eat without chewing, have three eyelids, and provide good living conditions for other animals. With the use of eighteen stunning full-colour photographs, Simon explores the wonders of these stealthy giants in an exciting up-close and personal way. Ages 8+

Illustrations and rhyming text inform the reader that, despite quills, claws, fangs, and more, animals--like children--all need love and affection.

What animal has the most powerful bite of any living creature? What animal has compounds within its blood that can combat diseases for which humans have no medicines? Which animal breathes air, but can stay submerged for hours at a time? The answer is of course the crocodylians - crocodiles, alligators and their cousins the caimans and the gharial. This book aims to be more than an introduction or overview of crocodiles: it will provide the reader with details only available previously in the scientific journals, specialist publications or much more technical books. The information is presented in clear language without the need for technical knowledge. The author has painstakingly ensured that the

information is based on the most recent studies. The text is accompanied by photos that further illuminate the true nature of these incredible predators. Whether casually interested or deeply fascinated by crocodiles, your needs are met in this book.

Provides information about alligators and crocodiles, including their differences and how they live, mate, and raise their young.

After her husband runs off with his mistress to open a crocodile farm in Kenya, Joséphine agrees to ghost-write the romance novel her sister Iris owes a famous publisher, and is shocked when the book becomes a runaway best-seller. Original.

Discusses the lives of crocodiles, focusing on how they hunt their prey.

Set in Cairo between 1997 and 2011, *The Crocodiles* is narrated in numbered, prose poem-like paragraphs, set against the backdrop of a burning Tahrir Square, by a man looking back on the magical and explosive period of his life when he and two friends started a secret poetry club amid a time of drugs, messy love affairs, violent sex, clumsy but determined intellectual bravado, and retranslations of the Beat poets. Youssef Rakha's provocative, brutally intelligent novel of growth and change begins with a suicide and ends with a doomed revolution, forcefully capturing thirty years in the life of a living, breathing, daring, burning, and culturally incestuous Cairo.
