Treat students to the best comprehensive foods textbook!

An easy-to-understand visual guide to the facts of food and nutrition. A nutritionist in a book that explains key concepts about food and what makes it good or bad for you, How Food Works brings the science of food to life. Through a highly visual approach that uses bold infographics, explore the good, the bad, the confusing, and the trending world of food. Discover what an antioxidant is, find out what a superfood

does to your body, and learn why it is dangerous to reheat rice. Covering a wide variety of topics, from dieting to gluten intolerance, How Food Works debunks common food myths, explains nutrition, covers the food groups, and looks into organic vs. processed foods. Follow the history of food production and free-range farming, how food is transported, and what "sell by" dates really mean. How Food Works is a completely comprehensive guide that will help readers understand the underlying biological effects of everyday foods through scientific evaluation, revealing the powers of different types of food and drinks.

We are not born knowing what to eat; as omnivores it is something we each have to figure out for ourselves. From childhood onward, we learn how big a "portion" is and how sweet is too sweet. We learn to enjoy green vegetables -- or not. But how does this education happen? What are the origins of taste? In *First Bite*, award-winning food writer Bee Wilson draws on the latest research from food psychologists, neuroscientists, and nutritionists to reveal that our food habits are shaped by a whole host of factors: family and culture, memory and gender, hunger and love. Taking the reader on a journey across the globe, Wilson introduces us to people who can only eat foods of a certain color; prisoners of war whose deepest yearning is for Mom's apple pie; a nine year old anosmia sufferer who has no memory of the flavor of her mother's cooking; toddlers who will eat nothing but hotdogs and grilled cheese sandwiches; and researchers and doctors who have pioneered new and effective ways to persuade children to try new vegetables. Wilson examines why the Japanese eat so healthily, whereas the vast majority of teenage boys in Kuwait have a weight problem -- and what these facts can tell Americans about how to eat better. The way we learn to eat holds the key to why food has gone so disastrously wrong for so many people. But Wilson also shows that both adults and children have immense potential for learning new, healthy eating habits. An exploration of the extraordinary and surprising origins of our tastes and eating habits, *First Bite* also shows us how we can change our palates to lead healthier, happier lives.

Focuses on food habits and nutrition in relation to good health, consumer decisions in the market place; and basic and creative food preparation.

"Anyone who eats should read this book: You will come to the table with new appreciation for the intersections between race and food . . . powerful."—Anna Lappé, author of *Diet for a Hot Planet* The growing trend of organic farming and homesteading is changing the way the farmer is portrayed in mainstream media, and yet, farmers of color are still largely left out of the picture. *The Color of Food* seeks to rectify this. By recognizing the critical issues that lie at the intersection of race and food, this stunning collection of portraits and stories challenges the status quo of agrarian identity. Author, photographer, and biracial farmer Natasha Bowens' quest to explore her own roots in the soil leads her to unearth a larger story, weaving together the seemingly forgotten history of agriculture for people of color, the issues they face today, and the culture and resilience they bring to food and farming. *The Color of Food* teaches us that the food and farm movement is about more than buying local and protecting our soil. It is about preserving culture and community, digging deeply into the places we've overlooked, and honoring those who have come before us. Blending storytelling, photography, oral history, and unique insight, these pages remind us that true food sovereignty means a place at the table for everyone. "Natasha Bowens, through her compelling stories and powerful images of a rainbow of farmers, reminds us that the industrialization of our food system and the oppression of our people—two sides of the same coin—will, if not confronted, sow the seeds of our own destruction."—Mark Winne, author of *Food Town, USA*

Covers such topics as self-discovery; relationships; managing resources (such as time, money, natural resources); housing; clothing; and foods.
