The Evolution engine (popularly known as Evo) is an air-cooled, 45-degree, V-twin engine manufactured from 1984 by Harley-Davidson for the company's motorcycles. It was made in the 1,340 cc (82 cu in) displacement for Harley-Davidson Big V-twins bikes, replacing the Shovelhead engine until 2000 when the last EVO was placed in a production factory custom FXR4 (FXR2 and FXR3 were the first CVOs).

Harley Evolution Engine Parts The AMF era of Harley was a tumultuous time for the MOCO. The brand survived some very lean years, but their name was now being associated with being unreliable. The Shovelhead was a decent engine for the time, but the quality was not always there and at the end of its life, it was struggling to compete with the ...

~~Harley Davidson Evolution Engine Parts | Dennis Kirk~~

On Evo engines, 20% of oil pressure is sent to the bottom end and 80% is sent to the top end. 34) The oil pump is non-regulatory and delivers its entire volume of oil under pressure to the oil filter mount. When an engine is cold, the engine oil will be more viscous (ie., thicker).
