What are different methods by which people traveled West? 3. When was the steam engine invented? What were some of the benefits of railroad travel over older forms of travel?

Transcontinental Railroad - Barrington High School

The Transcontinental Railroad greatly boosted America's economy and contributed to the westward expansion. Before the railroad, the fastest way to migrate to the West was by wagon, a journey fraught with danger over plains, deserts, mountains and rivers. Many chose the sea route instead, but people often contracted yellow fever and other diseases. The new railroad was much safer and faster and finally linked the East with the West.

The Transcontinental Railroad made Sheridan's strategy of "total war" much more effective. In the mid-19th century, it was estimated that 30 million to 60 million buffalo roamed the plains. In...

Young learners will be introduced to an important stage in history when they read *Building The Transcontinental Railroad*. This book is filled with photographs, interesting facts, discussion questions, and more, to effectively engage young learners in such a significant re-telling of events. Each 48-page title in *The History Of America Collection* delves into complex narratives in history. Concise, but comprehensive, these titles are very approachable for transitioning readers and learners beginning to recognize detail orientation and how to analyze text. Each book in this series features photographs, timelines, discussion questions, and more, to fully engage transitioning readers. *The History Of America Collection* engages students in major historical events with fascinating facts, photographs, and more. Readers are able to gauge their own understanding with before-reading questions that help build background knowledge and end-of-book comprehension and extension activities.

In this account of an unprecedented feat of engineering, vision, and courage, Stephen E. Ambrose offers a historical successor to his universally acclaimed *Undaunted Courage*, which recounted the explorations of the West by Lewis and Clark. *Nothing Like It in the World* is the story of the men who built the transcontinental railroad -- the investors who risked their businesses and money; the enlightened politicians who understood its importance; the engineers and surveyors who risked, and lost, their lives; and the Irish and Chinese immigrants, the defeated Confederate soldiers, and the other laborers who did the backbreaking and dangerous work on the tracks. The Union had won the Civil War and slavery had been abolished, but Abraham Lincoln, who was an early and constant champion of railroads, would not live to see the great achievement. In Ambrose's hands, this enterprise, with its huge expenditure of brainpower, muscle, and sweat, comes to life. The U.S. government pitted two companies -- the Union Pacific and the Central Pacific Railroads -- against each other in a race for funding, encouraging speed over caution. Locomotives, rails, and spikes were shipped from the East through Panama or around South America to the West or lugged across the country to the Plains. This was the last great building project to be done mostly by hand: excavating dirt, cutting through ridges, filling gorges, blasting tunnels through mountains. At its peak, the workforce -- primarily Chinese on the Central Pacific, Irish on the Union Pacific -- approached the size of Civil War armies, with as many as fifteen thousand workers on each line. The Union Pacific was led by Thomas "Doc" Durant, Oakes Ames, and Oliver Ames, with Grenville Dodge -- America's greatest railroad builder -- as chief engineer. The Central Pacific was led by California's "Big Four": Leland Stanford, Collis Huntington, Charles Crocker, and Mark Hopkins. The surveyors, the men who picked the route, were latter-day Lewis and Clark types who led the way through the wilderness, living off buffalo, deer, elk, and antelope. In building a railroad, there is only one decisive spot -- the end of the track. Nothing like this great work had been seen in the world when the last spike, a golden one, was driven in at Promontory Summit, Utah, in 1869, as the Central Pacific and the Union Pacific tracks were joined. Ambrose writes with power and eloquence about the brave men -- the famous and the unheralded, ordinary men doing the extraordinary -- who accomplished the spectacular feat that made the continent into a nation.

This landmark volume sheds light on the lives and experiences of the Chinese workers who made up 90% of the workforce that built the Central Pacific Railroad--but who have been little understood and largely invisible in traditional accounts of the building of the First Transcontinental Railroad.

After the Civil War, the building of the transcontinental railroad was the nineteenth century's most transformative event. Beginning in 1842 with a visionary's dream to span the continent with twin bands of iron, *Empire Express* captures three dramatic decades in which the United States effectively doubled in size, fought three wars, and began to discover a new national identity. From self-made entrepreneurs such as the Union Pacific's Thomas Durant and era-defining figures such as President Lincoln to the thousands of laborers whose backbreaking work made the railroad possible, this extraordinary narrative summons an astonishing array of voices to give new dimension not only to this epic endeavor but also to the culture, political struggles, and social conflicts of an unforgettable period in American history.

A Finalist for the Pulitzer Prize: "A powerful book, crowded with telling details and shrewd observations." —Michael Kazin, *New York Times Book Review* This original, deeply researched history shows the transcontinentals to be pivotal actors in the making of modern America. But the triumphal myths of the golden spike, robber barons larger than life, and an innovative capitalism all die here. Instead we have a new vision of the Gilded Age, often darkly funny, that shows history to be rooted in failure as well as success.

A groundbreaking, breathtaking history of the Chinese workers who built the Transcontinental Railroad, helping to forge modern America only to disappear into the shadows of history until now.

Empire's Tracks boldly reframes the history of the transcontinental railroad from the perspectives of the Cheyenne, Lakota, and Pawnee Native American tribes, and the Chinese migrants who toiled on its path. In this meticulously researched book, Manu Karuka situates the railroad within the violent global histories of colonialism and capitalism. Through an examination of legislative, military, and business records, Karuka deftly explains the imperial foundations of U.S. political economy. Tracing the shared paths of Indigenous and Asian American histories, this multisited interdisciplinary study connects military occupation to exclusionary border policies, a linked chain spanning the heart of U.S. imperialism. This highly original and beautifully wrought book unveils how the transcontinental railroad laid the tracks of the U.S. Empire.

Experience the race of rails to link the country—and meet the men behind this incredible feat—in a riveting story about the building of the transcontinental railroad, brought to life with archival photos. In the 1850s, gold fever swept the West, but people had to walk, sail, or ride horses for months on end to seek their fortune. The question of faster, safer transportation was posed by national leaders. But with 1,800 miles of seemingly impenetrable mountains, searing deserts, and endless plains between the Missouri River and San Francisco, could a transcontinental railroad be built? It seemed impossible. Eventually, two railroad companies, the Central Pacific, which laid the tracks eastward, and the Union Pacific, which moved west, began the job. In one great race between iron men with iron wills, tens of thousands of workers blasted the longest tunnels that had ever been constructed, built the highest bridges that had ever been created, and finally linked the nation by two bands of steel, changing America forever.

Of Nathaniel Hawthorne's insight into the Puritan's simultaneous need for fulfillment and self-destruction, D. H. Lawrence wrote, "Nathaniel knew disagreeable things in his inner soul. He was careful to send them out in disguise." By means of artfully crafted and compelling tales, Hawthorne explored the destinies and concerns of early American settlers and citizens. In several of the stories in this collection, characters who hold themselves apart from their fellow man fall prey to the corroding desires of lust for perfection. Then they unwittingly commit evils—against themselves and others—in the name of pride. Edgar Allan Poe noted of Hawthorne's writing: "Every word tells, and there is not a word which does not tell."

Union Pacific is America's most popular railroad. The first to create a transcontinental railroad link in 1869 in conjunction with the Central Pacific, UP was also the first U.S. railroad to create a modern streamlined passenger train. Sleek, quiet, powerful, and fast, the lightweight streamliner set a new standard for luxury on the rails. This authoritative, illustrated history follows up streamliners from 1934 with the launch of the City of Salina right up to Union Pacific's ceding of passenger service to Amtrak in 1971. Award-winning rail author Joe Welsh examines the fleet of "City" trains that followed the Salina, all connecting Chicago to their namesakes with revolutionary equipment and diesel motive power on breakneck schedules. In addition to detailed looks at the trains, readers are treated to their various forms of motive power and rolling stock, and their unparalleled services. Dozens of black-and-white images and period color photos depict the City of Portland, City of Denver, City of Los Angeles, City of San Francisco, and City of St. Louis along, with period ads and route maps to complete the picture. Images also detail the opulent furnishings and impeccable service that distinguished America's premier passenger line--from uniforms and dinnerware to the most exotic lounge cars ever built.
