Gerald Bordman's American Musical Theatre has become a landmark book since its publication in 1978. It chronicles American musicals, show by show and season by season, and offers a running commentary and assessment as well as providing the basic facts about each production. This updated edition includes the new shows that have opened on Broadway since the original publication. Also included are over a hundred musicals that were turn-of-the-century, cheap-priced touring shows which

never played Broadway, but were the training ground for many theatre greats.

The IASLC Atlas of PD-L1 Immunohistochemistry Testing in Lung Cancer is a resource designed to help pathologists, clinicians, other health care personnel, and patients better understand emerging programmed cell death ligand-1 (PD-L1) immunohistochemistry (IHC) assays as well as important areas of clarity and debate.

This book presents operational and practical issues of automotive mechatronics with

special emphasis on the heterogeneous automotive vehicle systems approach, and is intended as a graduate text as well as a reference for scientists and engineers involved in the design of automotive mechatronic control systems. As the complexity of automotive vehicles increases, so does the dearth of high competence, multi-disciplined automotive scientists and engineers. This book provides a discussion into the type of mechatronic control systems found in modern vehicles and the skills required by automotive scientists and engineers working in this environment.

Divided into two volumes and five parts, Automotive Mechatronics aims at improving automotive mechatronics education and emphasises the training of students' experimental hands-on abilities, stimulating and promoting experience among high education institutes and produce more automotive mechatronics and automation engineers. The main subject that are treated are: VOLUME I: RBW or XBW unibody or chassis-motion mechatronic control hypersystems; DBW AWD propulsion mechatronic control systems; BBW AWB dispulsion mechatronic control systems; VOLUME II: SBW AWS diversion mechatronic

control systems; ABW AWA suspension mechatronic control systems. This volume was developed for undergraduate and postgraduate students as well as for professionals involved in all disciplines related to the design or research and development of automotive vehicle dynamics, powertrains, brakes, steering, and shock absorbers (dampers). Basic knowledge of college mathematics, college physics, and knowledge of the functionality of automotive vehicle basic propulsion, dispulsion, conversion and suspension systems is required.

This book analyzes the drug-discovery process in Japan, based on detailed case studies of 12 groups of 15 innovative drugs. It covers the first statin in the world up to the recent major breakthrough in cancer therapy, the recent immune checkpoint inhibitor, the scientific discovery for which a 2018 Nobel

Prize in Physiology or Medicine was awarded to Prof. Tasuku Honjo, Kyoto University. The book shows the pervasive high uncertainty in drug discovery: frequent occurrences of unexpected difficulties, discontinuations, serendipities, and good luck, significantly because drug discovery starts when the underlying science is incomplete. Thus, there exist dynamic interactions between scientific progress and drug discovery. High uncertainty also makes the value of an entrepreneurial scientist high. Such scientists fill the knowledge gaps by absorbing external scientific progress and by relentless pursuit

of possibilities through their own research, often including unauthorized research, to overcome crises. Further, high uncertainty and its resolution significantly characterize the evolution of competition in the drug industry. The patent system promotes innovation under high uncertainty not only by enhancing appropriability of R&D investment but also by facilitating the combination of knowledge and capabilities among different firms through disclosure. Understanding such a process significantly benefits the creation of innovation management and policy practices.

Although pancreatic cancer is one of the most serious forms of cancers, the lack of clinical symptoms often limits curative treatment options. This book gives insight into the current understanding of the management of pancreatic cancer and considers recent findings in cancer research. It provides answers to questions of how to know when cancer is respectable, how to proceed when the diagnosis comes too late for a curative approach, and how to assess different study results.

This book constitutes the proceedings of the 16th International Conference on Practical Applications of Agents and Multi-Agent Systems, PAAMS 2018, held in Toledo, Spain, in June 2018. The 20 regular and 19 demo papers presented in this volume were carefully reviewed and selected from 57 submissions. They deal with the application and validation of agent-based models, methods, and technologies in a number of key applications areas, such as: energy and security; engineering and tools; evaluation and ethics; negotiation and organisations; personalization and learning; simulation

applications; simulation platforms; social networks and humans. The book also contains two invited talks in full paper length.

In 1966 Congress passed the National Sea Grant College Program Act to promote marine research, education, and extension services in institutions along the nation's ocean and Great Lakes coasts. In Maryland a Sea Grant Program -- a partnership among federal and state governments, universities, and industries -- began in 1977, and in 1982 the University of Maryland was named the nation's seventeenth Sea Grant College. The Maryland

Sea Grant College focuses its efforts on the Chesapeake Bay, with emphasis on the marine concerns of fisheries, seafood technology, and environmental quality. This report addresses the emerging science and developing technologies encompassed by marine biotechnology. It contains a broad overview of marine biotechnology, sets forth industrial realities, and assesses the future potential of this new field of biotechnology. The report has eight chapters. The first contains a wide range of major scientific achievements in marine biotechnology. The subjects encompassed

within marine biotechnology are grouped within six areas: aquaculture, marine animal health, marine natural health, marine natural products, biofilm and bioadhesion in the marine environment, bioremediation, and marine ecology and biological oceanography. The remaining chapters detail an extensive survey and status report on marine biotechnology in the United States, Japan, Australia, and Norway.

Mechatronics Department at the Mechanical Engineering Faculty, “Politehnica” University of Timisoara, Romania, under the patronage of the IFToMM Technical Committees Linkages and Mechanical Controls and Micromachines. The workshop brought together researchers and students who work in disciplines associated with mechanisms science and offered a great opportunity for scientists from all over the world to present their achievements, exchange innovative ideas and create solid international links, setting the trend for future developments in this important and creative field. The topics treated in this

This book provides a collection of comprehensive, up-to-date, and broadly applicable guides to the research and development fields of oligonucleotide (ON) therapeutics. Covering topics from the study of antisense and anti-gene effects to oligonucleotides in the context of drug discovery and development, the volume

explores a wide-ranging and useful spectrum of methods and protocols needed to take full advantage of therapeutic applications involving ONs. Written for the highly successful *Methods in Molecular Biology* series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. *Authoritative and practical, Oligonucleotide-Based Therapies: Methods and Protocols* aims to be a great aid in the laboratory as well as an ideal
