A Haskell package is a collection of modules. The `mtl` package comes with the Haskell Platform, so you probably already have it. To check if you do, type `ghc-pkg list` in the command-line. This will show which Haskell packages you have installed and one of them should be `mtl`, followed by a version number.

For a Few Monads More - Learn You a Haskell for Great Good!

like you will be able to follow along and learn Haskell. The channel `#haskell` on the freenode network is a great place to ask questions if you're feeling stuck. People there are extremely nice, patient and understanding to newbies. I failed to learn Haskell approximately 2 times before ?nally grasping it
