When the Mazda MX-5 was launched in 1989, sports car enthusiasts gave thanks. Safety regulations had virtually killed off the traditional roadster in the early 1970s, and if you wanted the wind in your hair the choice seemed limited to a four-seater convertible that looked like a baby's buggy. Hopes were pinned on the launch of a new MG - but the MX-5 got there first. The car is a star. Here is the full story, from genesis and model evolution to ownership, with all the possibilities that offers.

"[An] exciting and darkly funny crime novel." -C. Moon Read, Las Vegas Weekly. 1 of Our 20 Favorite Books of the Past Twenty Years Sal Cupertine is a legendary hit man for the Chicago Mafia, known for his ability to get in and out of a crime without a trace. Until now, that is. His first-ever mistake forces Sal to botch an assassination, killing three undercover FBI agents in the process. This puts too much heat on Sal, and he knows this botched job will be his death sentence to the Mafia. So he agrees to their radical idea to save his own skin. A few surgeries and some intensive training later, and Sal Cupertine is gone, disappeared into the identity of Rabbi David Cohen. Leading his growing congregation in Las Vegas, overseeing the population and the temple and the new cemetery, Rabbi Cohen feels his wicked past slipping away from him, surprising even himself as he spouts quotes from the Torah or the Old Testament. Yet, as it turns out, the Mafia isn't quite done with him yet. Soon the new cemetery is being used as both a money and body-laundering scheme for the Chicago family. And that rogue FBI agent on his trail, seeking vengeance for the murder of his three fellow agents, isn't going to let Sal fade so easily into the desert. Gangsterland is the wickedly dark and funny new novel by a writer at the height of his power—a morality tale set in a desert landscape as ruthless and barren as those who inhabit it.

Thomas Keneally, the bestselling author of *The Daughters of Mars* and *Schindler's List*, brings his "insightful and nimble prose" (*The New York Times Book Review*) to this exquisite exploration of community and country, love and morality, set in both prehistoric and modern Australia. An award-winning documentary filmmaker, Shelby Apple is obsessed with reimagining the full story of the Learned Man—a prehistoric man whose remains are believed to be the link between Africa and ancient Australia. From Vietnam to northern Africa and the Australian Outback, Shelby searches for understanding of this enigmatic man from the ancient past, unaware that the two men share a great deal in common. Some 40,000 years in the past, the Learned Man has made his home alongside other members of his tribe. Complex and deeply introspective, he reveres tradition, loyalty, and respect for his ancestors. Willing to sacrifice himself for the greater good, the Learned Man cannot conceive that a man millennia later could relate to him in heart and feeling. In this "meditation on last things, but still electric with life, passion and appetite" (*The Australian*), Thomas Keneally weaves an extraordinary dual narrative that effortlessly transports you around the world and across time, offering "a hymn to idealism and to human development" (*Sydney Morning Herald*).

High-Security Mechanical Locks comprehensively surveys and explains the highly technical area of high security locks in a way that is accessible to a wide audience. Well over 100 different locks are presented, organized into 6 basic types. Each chapter introduces the necessary concepts in a historical perspective and further categorizes the locks. This is followed by detailed 'how it works' descriptions with many pictures, diagrams and references. The descriptions are based on actual dissections of the real locks. The scope is limited to key operated mechanical locks, thus keyless combination locks and digital locks are not covered. The book does not deal with routine locksmithing topics such as installation and servicing of locks. The legendary Silicon Valley entrepreneur examines how both business and government organizations can harness the power of disruptive technologies. Tom Siebel, the billionaire technologist and founder of Siebel Systems, discusses how four technologies—elastic cloud computing, big data, artificial intelligence, and the Internet of things—are fundamentally changing how business and government will operate in the 21st century. While this profound and fast-moving transformation can appear daunting to some, Siebel shows how organizations can not only survive, but thrive in the new digital landscape. In this authoritative yet accessible book, Siebel guides readers through the technologies driving digital transformation, and demonstrates how they can strategically exploit their powerful capabilities. He shows how leading enterprises such as Enel, 3M, Royal Dutch Shell, the U.S. Department of Defense, and others are applying AI and IoT with stunning results.
