Summer Tanager

This species is one of the most widely distributed, abundant, well-known, and well-named birds in North America. Polytypic. Length 8.7". Usually sits in an obvious place or is found in flocks ...

Red-Winged Blackbird

The most widespread, numerous, and geographically variable chickadee, this bird brightens winter days at bird feeders and eagerly takes advantage of nest boxes. It is curious, with little or no ...

Black-Capped Chickadee

The “chicken hawk” of colonial America, this medium-sized accipiter is a common sight at home bird feeders across the country, swooping in to nab an unwary dove or jay. Females are larger and ...

Cooper's Hawk

Coexists in similar habitat with the barred owl. Migration: northern birds migrate to southern states and into Mexico. Southern forms are nonmigratory. Vagrant: there are records of eastern birds ...

Red-Shouldered Hawk

Long wings; relatively short tail; straight, sharply pointed largely blue-gray bill with a blackish culmen; blue-gray legs. Adult Male: black eye line, crown, nape, and back. Bright orange ...

Bullock's Oriole

Download File PDF National Geographic Complete Birds Of North America

The North American population (nominate ssp.) exhibits extensive geographic variation, with clinal variation: larger birds with shorter appendages in colder climes, darker plumages in more-humid ...

House Sparrow

This species' often confiding nature, distinctive plumage, pleasing song, and acceptance of human-dominated habitats make it one of the most beloved of North American birds. Polytypic.

American Robin

It exhibits the greatest range of geographic variation of any galliform ... "Masked bobwhite:" similar to eastern birds, but it has a black face with the white eye line greatly reduced ...

Northern Bobwhite

This highly variable city pigeon is familiar to all urban dwellers. Multicolored birds were developed over centuries of near domestication. Polytypic (12 ssp.; nominate in North America.). Length ...

Rock Pigeon

It times its nesting to coincide with summer berry production, putting it among the latest of North American birds to nest. It is highly gregarious; flocks of hundreds, occasionally thousands ...

Cedar Waxwing

Ear tufts are prominent if raised; when flattened the bird has a round-headed look ... Both species are found at Big Bend National Park in Texas, where the western is uncommon and the eastern ...

Download File PDF National Geographic Complete Birds Of North America

Eastern Screech Owl

Immatures have narrower and more pointed outer tail feathers. Flight: relatively slow, with steady, rowing wingbeats, but the birds are easily able to quickly change direction in flight.

Black-Billed Magpie

The striking rose-breasted grosbeak is a common bird of wooded habitats across much of eastern and midwestern North America. Singing from the canopy of a deciduous forest, even a brightly colored ...

Rose-Breasted Grosbeak

The birds tend to work mid and top parts of broad, leafy trees. Polytypic. Length 5.5". Among the dullest of vireos, lacking wing bars and spectacles; gray with brownish or greenish tones to the ...

Warbling Vireo

Complete summer molt produces plumage like adult male by late fall. Immature female: resembles adult female but upperparts fresher in February to June; throat often lacks rose spots. Costa's ...

Anna's Hummingbird

With its dusty dirt streets and ranchers in cowboy boots, Nova Califórnia feels like the Wild West, complete with a growing ... Brazil's National Institute of Space Research.
