Research Paper (postgraduate) from the year 2008 in the subject Sociology - Children and Youth, grade: 1.5, Mindanao State University, course: Sociology, language: English, abstract: The problems of teenagers involving drug abuse and alcohol abuse are primarily caused by stressful life events, peer influence, and failure of parents to take their children away from harmful activities. Besides, drug abuse and alcohol abuse might lead to sexual abuse or molestation and teenage pregnancy as well as the commission of violent crimes. This paper is aimed at studying these factors for the benefit of the government, academe, church, organizations and other institutions, the members of which are advocates of helping teenagers who have problems on alcohol and drug abuse.

This volume reviews a range of empirically supported approaches to prevention and treatment of adolescent substance use problems. The focus is on motivationally based brief interventions that can be delivered in a variety of contexts, that address key developmental considerations, and that draw on cutting-edge knowledge on addictive behavior change. From expert contributors, coverage encompasses alcohol skills training; integrative behavioral and family therapy; motivational interviewing; interventions for dually diagnosed youth; Internet-based education, prevention, and treatment; and applications to HIV prevention. The volume is extensively referenced and includes numerous clinical illustrations and vignettes.

The purpose of this collection is to provide a forum to integrate pre-clinical and clinical investigations regarding the long-term consequences of adolescent exposure to drugs of abuse. Adolescence is characterized by numerous behavioral and biological changes, including substantial neurodevelopment. Behaviorally, adolescents are more likely to engage in risky activities and make impulsive decisions. As such, the majority of substance use begins in adolescence, and an earlier age of onset of use (
