The book is devoted to the description of the fundamentals in the area of magnetic resonance. The book covers two domains: radiospectroscopy and quantum radioelectronics. Radiospectroscopy comprises nuclear magnetic resonance , electron paramagnetic resonance, nuclear quadrupolar resonance, and some other phenomena. The radiospectroscopic methods are widely used for obtaining the information on internal (nano, micro and macro) structure of objects. Quantum radioelectronics, which was developed on the basis of radiospectroscopic methods, deals with processes in

packages. This book teaches from scratch everything the working scientist needs to know using copious, downloadable, useful and adaptable code snippets. Readers will discover how easy it is to implement and test non-trivial mathematical algorithms and will be guided through the many freely available add-on modules. A range of examples, relevant to many different fields, illustrate the language's capabilities. The author also shows how to use pre-existing legacy code (usually in Fortran77) within the Python environment, thus avoiding the need to master the original code. In this new edition, several chapters have been re-written to reflect the IPython notebook style. With an extended index, an entirely new

chapter discussing SymPy and a substantial increase in the number of code snippets, researchers and research students will be able to quickly acquire all the skills needed for using Python effectively.

Two Captains is the most renowned novel of the Russian writer Veniamin Kaverin. The plot spans from 1912 to 1944. For more than half a century the book has been loved by children and adults alike. The novel has undergone more than 100 printings, including translations into other languages. Based on its story, plays have been staged and an opera has been written. The plot of the book also became the basis of two movies of the same title in 1955 and 1976. In

1995 in Pskov, the home town of the author, a monument was erected to the characters of the book and a "Two Captains" museum was opened. The real prototype for Captain Tatarinov was Lieutenant Georgii Brusilov, who in 1912 organized a privately funded expedition seeking a west-to-east Northern sea route. The steamship "St. Anna," specially built for the expedition, left Petersburg on 28 July 1912. Near the shores of Yamal peninsula it was seized by ice and carried in the ice drift to the north of the Kara Sea. The expedition survived two hard winters. Of the 14 people who left the stranded steamship in 1914, only two made it to one of the islands of Frants-Joseph Land and were spotted and taken aboard "St. Foka,"

the ship of the expedition of G. Y. Sedov. The ship log they had kept with them contained the most important of the scientific data, after the study of which Sedov's expedition found the previously unknown island in the Kara Sea, Vize Island. The ultimate fate of "St. Anna" and its remaining crew is still unknown. Veniamin Kaverin (1902-1989) wrote novels, short stories, fairy tales, memoirs, and biographies. In the early 1920s, Veniamin Kaverin was a member of experimental literary group "Serapionovi bratya." In 1946 his novel Two Captains became the winner of the USSR State Literature Award.

The decades-long Cold War was more than a bipolar

Read Online Sib Siberian Mouse Masha

conflict between two Superpowers-it had implications for the entire world. In this accessible, comprehensive retelling, Carole K. Fink provides new insights and perspectives on key events with an emphasis on people, power, and ideas. Cold War goes beyond US-USSR relations to explore the Cold War from an international perspective, including developments in Africa, Asia, and Latin America. Fink also offers a broader time line of the Cold War than any other text, charting the lead-up to the conflict from the Russian Revolution to World War II and discussing the aftermath of the Cold War up to the present day. The second edition reflects the latest research and scholarship and offers additional information about
