The best known book in the field, *Supervision: A Redefinition* is a research-based guide to the practice and philosophy of supervision. Practical applications are supported by a conception of supervision as moral agency, and the book continues to promote a redefinition of supervision from a traditional top-down hierarchy to a shared activity involving all stake-holders in the school—including teachers, administrators, and parents. The eighth edition continues a thirty-plus year tradition of breaking new ground by reconsidering the field of supervision in response to changing school contexts, policies, and realities. The new edition shows even more clearly how the book's ideas can be used to help supervisors improve their effectiveness: practical suggestions abound.

First published in 1971 and now the best known book in the field, *Supervision: A Redefinition* continues to be the leading text for combining an in-depth view of theory and research for supervision with practical applications. The Seventh Edition continues a thirty-year tradition of breaking new ground by continuously redefining the field of supervision in response to changing school contexts, policies, and realities. The practical applications are supported by a conception of supervision as moral agency. The book continues to promote a new vision, or redefinition, of supervision from that of a top-down activity performed by higher-ups in the school hierarchy, to one in which supervision is a shared activity involving all stake-holders in the school including teachers, administrators, and parents. The book sees schools as communities rather than organizations, and emphasizes the student-teacher relationship rather than bureaucratic functions.

The ninth edition of *Supervision: A Redefinition* is a research-based guide to the practice of supervision that aims to clarify the major challenges teachers and supervisors face within the policy context; focus on essential, foundational understandings that feed the integrity of teaching and supervision; and explore the complexities of the practice of supervision and teaching which supervisors must deal with. The 9th edition re-defines supervision once again in light of the complex demands being placed on principals and central office administrators, while continuing to emphasize the book ' s original theme of human perspectives.

The first edition of this book, titled *A DESIGN FOR INSTRUCTIONAL SUPERVISION*, provided a structural framework for an effective program of instructional supervision. The basic cognitive thrust of this second edition, *SUPERVISION: A Guide to Instructional Leadership*, remains the same as the first. What has changed is the attention to the detail surrounding the design components. References have been updated and streamlined, activities have been modified, and examples of structure have been created using the current national policy situation as a base. Philosophical and historical definitions of supervision are maintained and expanded in this edition. It will help professionals with responsibilities for instructional leadership design a supervisory program that fits a local situation by taking advantage of the foundation provided herein. Attention is given to the selection of and the interrelationships between those assumptions, principles, objectives, criteria, and procedures so that planners of supervisory programs will gain the knowledge and tools necessary to create that structure from this book. It also provides a means for schools to have a well-conceived, carefully designed, properly implemented, and continuously evaluated plan for the supervision of instruction in order to reply competently to state and federally mandated assessments for students. In addition, personal perspectives of the authors are presented in each part of the text. The book will serve as a guide and provide direction to instructional supervisors, directors of services, principals, administrators at all levels, teachers, grade level or department chairs, and others interested in the management of instruction in the school setting.
