Significantly expanded, updated, and improved with 50% new material, this is a comprehensive review of scholarly research and theory in men ` s studies. No other book can approach it in its coverage of the volume of men ` s studies research, its provision of a theoretical context for understanding the research, and its boxed features--most of which highlight the human aspects of the subject matter. Organized in three parts, the book offers a view of masculinity from a wide variety of perspectives. The first two chapters provide an introduction to contemporary concepts of men and masculinity, as well as the scientific study of sex and gender. In the second section, these concepts are applied to the major schools of psychological theory: psychobiology, social learning, humanism/existentialism, psychoanalysis, and socioculturalism. The last part of the book summarizes " men ` s issues: " work, emotion, relationships, physical health, mental health, violence, and the changing definitions of what it means to be male in contemporary society.

What did it mean to be a man in medieval England? Most would answer this question by alluding to the power and status men enjoyed in a patriarchal society, or they might refer to iconic images of chivalrous knights. While these popular idas do have their roots in the history of the aristocracy, the experience of ordinary men was far more complicated. Marshalling a wide array of colorful evidence—including legal records, letters, medical sources, and the literature of the period—Derek G. Neal here plumbs the social and cultural significance of masculinity during the generations born between the Black Death and the Protestant Reformation. He discovers that social relations between men, founded on the ideals of honesty and self-restraint, were at least as important as their domination and control of women in defining their identities. By carefully exploring the social, physical, and psychological aspects of masculinity, The Masculine Self in Late Medieval England offers a uniquely comprehensive account of the exterior and interior lives of medieval men.

Witty, compelling, and shrewd, Mansfield ` s Book of Manly Men is about resurrecting your inborn, timeless, essential, masculine self. The Western world is in a crisis of discarded honor, dubious integrity, and faux manliness. It is time to recover what we have lost. Stephen Mansfield shows us the way. Working with timeless maxims and stirring examples of manhood from ages past, Mansfield issues a trumpet call of manliness fit for our times. " My goal in this book is simple, " he says. " I want to identify what a genuine man does—the virtues, the habits, the disciplines, the duties, the actions of true manhood—and then call men to do it. "

Injured Men is a unique casebook of clinical material pertaining to men who have sustained trauma. With the exception of those publications dealing with the military, clinical vignettes of traumatized individuals are overwhelmingly female. By comparison, little has been written about the plight of men. Injured Men begins to fill that void. Richly illustrated with both brief and extensively detailed analytic case reports, Injured Men describes the manifestations of such phenomena as physical and sexual abuse, unresolved grief, genocidal persecution, intergenerational transmission of trauma, and of course, combat. With his perspective on dissociation and dissociative disorders, Brenner also presents a traumatic pathway to the development of a masculine self in those with female bodies. In dealing with the long term effects of trauma, he advocates a pluralistic approach, which he demonstrates in the final chapter of this fascinating volume.

Most men have given up on their dreams. Is that man you? Something is so clearly wrong, and the entire world knows it. The reality is that men have been sold a lie; they have been told that if they chase success in the world then everything will be ok. Instead, they end up with the cars, the house, the toys, and are still left in pain asking, " Is this all there is? " The cost of the lie is enormous. Becoming a Significant Man provides easy to digest ways on how to become the man you want to be and stay there. If you are tired of sleepwalking your way through life, then Becoming a Significant Man is for you. Warren Peterson, founder of Significant Man, is eager for all men who have fallen behind in the game of life to benefit from his unique and powerful message. Haven ` t you had enough? Enough of the struggle? Enough of feeling lost, without direction, and without hope? No more lies. No more pretending. Your time is now. You have the power and permission to stand up and scream the truth about who you are—the significant man you were created to be. Let ` s get started!

At last we have an honest and touching account on the masculine personality and emotions based on the authors personal quest, and clinical observations from years of extensive experience. The Masculine Heart is an important contribution to the Biopsychosocial Sciences and Humanities. Emmanuel Hrisio, MD Chairman, Department of Psychiatry and Behavioral Health, Christ Hospital, Jersey City, NJ. Clinical Assistant Professor of Psychiatry, UMDNJ, Robert Wood Johnson Medical School A tour de force journey into the masculine heart. The undtected and behind the scene tragedies suffered by little boys and young men not only at home, but also in consumer culture, come to light. A holistic account of how men become wounded within the nest and outside of it. Distorted definitions of male success by corporate and media profits before people consciousness, sets the stage for this unraveling poetic tale of burned out, exploited and psychologically unsuccessful fathers and sons. In an uncommon and distinctive voice, Kandarjian invites the forces that perpetuate the development of the false male self to refl ect upon the massive damage and consider brotherly options. Ultimately, a contemporary male narrative about self-possession: possession of emotions, intuitive instincts, reason, and drive. Finally, a book that redefines male power for the 21st century and competently anchors it into the charitable heart.

Many of us absorbed the rules for being male or female from our families and the culture in which we grew to adulthood. We formed beliefs about a man's role and a woman's role based on what we observed and experienced: mostly, those beliefs had to do with what men and woman did rather than who they were. Our ideas about what constitutes "masculine" and "feminine", by now outdated and inadequate, have led to a precarious imbalance both in our inner lives and in our external lives of relating to men and women. The result? A gender war.In Joining Forces, Jeanie Miley explains that our deeply ingrained gender expectations have created an imbalance in our emotional and spiritual lives and have kept us from becoming our most authentic selves. Joining Forces will help readers discover the masculine and feminine characteristics that connect, unite, and restore us—traits that men and women alike can and do express. By joining our masculine and feminine strengths, we restore our own souls, our creative energies, and our own true, essential natures.

Portraits of self-made men are rife in Western culture, as James V. Catano observes. Positive and negative, admittedly fictional and ostensibly factual, these portraits endure because the general rhetorical practice embodied in the myth of the self-made man enacts both the need and the very means for making oneself masculine: verbal power and prowess. The myth of the self-made man, in short, is part of ongoing rhetorical practices that constitute society, culture, and subjects. To explain those practices and their effectiveness, Catano argues that the basic narrative achieves much of its effectiveness by engaging and enacting the traditional psychological dynamics of the family romance: preoedipal separation, oedipal conflict, and " proper" postoedipal self-definition and socialization. To focus on the combined social, psychological, and rhetorical dynamics that constitute the ongoing activity he calls masculine self-making, Catano emphasizes a particular strand: masculinity and steelmaking. Pursuing that strand, he argues that these representations of masculine self-making are rhetorical enactments of cultural needs and desires, and that they are ongoing and formative arguments about what society and its individuals either are or should be.
