" The Social Life of DNA is a brilliant ethnography of the recreational uses of DNA. Besieged as our culture has become by beguiling promises of romantic heraldry and forensic infallibility, Nelson takes an unflinching yet sympathetic look at how popular yearning for 'lost roots' has led to DNA as metaphor: 'reading' our genes has become an inferential, often scientifically unsubstantiated link between past,present and future.

This diffusion comprises the social life of DNA. This social-life approach to genetics follows the methodology of the anthropologist Arjun Appadurai, who, in The Social Life of Things, argues that to understand what objects mean and why they are important we must trace their circulation in society ("things-in-motion"), illuminating "their human and social context" and revealing "the human transactions and calculations that enliven things." By similarly tracking DNA analysis, we ...
