An exciting adventure to a mysterious, exotic, and cruel land hidden in the African wilds, to which Leonard Outram and Otter, his servant, sojourn in pursuit of wealth to reclaim his ancestral home, but he ends up gaining much more than that. Penniless Leonard Outram attempts to redress the undeserved loss of his family estates and fiancée by seeking his fortune in Africa. In the course of his adventures, he and his Zulu companion Otter save a young Portuguese woman, Juanna Rodd, together with her nursemaid Soa, from slavery. Leonard and Juanna are attracted to each other, but prone to bickering, and their romance is impeded by the watchful and jealous Soa.

An investigative journey into the ways the resource trade wreaks havoc on Africa, 'The Looting Machine' sheds light on the shadowy networks that connect Goldman Sachs, BP, the Hong Kong underworld and the murderous cabals that rule some oil states.

Africa has been coveted for its riches ever since the era of the Pharaohs. In past centuries, it was the lure of gold, ivory, and slaves that drew fortune-seekers, merchant-adventurers, and conquerors from afar. In modern times, the focus of attention is on oil, diamonds, and other valuable minerals. Land was another prize. The Romans relied on their colonies in northern Africa for vital grain shipments to feed the population of Rome. Arab invaders followed in their wake, eventually colonizing the entire region. More recently, foreign corporations have acquired huge tracts of land to secure food supplies needed abroad, just as the Romans did. In this vast and vivid panorama of history, Martin Meredith follows the fortunes of Africa over a period of 5,000 years. With compelling narrative, he traces the rise and fall of ancient kingdoms and empires; the spread of Christianity and Islam; the enduring quest for gold and other riches; the exploits of explorers and missionaries; and the impact of European colonization. He examines, too, the fate of modern African states and concludes with a glimpse of their future. His cast of characters includes religious leaders, mining magnates, warlords, dictators, and many other legendary figures—among them Mansa Musa, ruler of the medieval Mali empire, said to be the richest man the world has ever known. "I speak of Africa," Shakespeare wrote, "and of golden joys." This is history on an epic scale.

"Africa was partitioned and colonized by the Europeans. After military conquest came the commercial exploitation of the wealth of Africa. The intensity of resistance to colonization varied from one region to another, but a new economic and social system linked with colonization was put in place, bringing about unprecedented demographic and political change."--Publisher's description.

The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis. In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.
